In the claims:

Claim 1 (currently amended). A box call comprising a an elongate box having a pair of longitudinal longitudinally extending walls, a sounding chamber between said walls, a longitudinally extending upper arcuate edge on at least one of said walls, and a an elongate paddle, said paddle having a lower surface for engaging said ~~at least~~ one edge for making sounds, and said paddle lower surface being longitudinally having a pair of edges which extend longitudinally of said paddle and which are arcuate.

Claim 2 (original). A box call according to claim 1 wherein said paddle lower surface has a centrally truncated lateral arc.

Claim 3 (original). A box call according to claim 1 wherein said paddle has a width of about 1 3/4 inch, and said paddle lower surface is arcuate laterally and has an arc rise laterally of about 1/8 to 3/16 inch.

Claim 4 (original). A box call according to claim 1 wherein said paddle has a width of about 1 3/4 inch, and said paddle lower surface is arcuate laterally and has an arc rise laterally of about 1/8 inch.

Claim 5 (original). A box call according to claim 1 wherein said paddle is pivotly attached to an end portion of said box.

Claim 6 (currently amended). A box call comprising a an elongate box having a pair of longitudinal longitudinally extending walls, a sounding chamber between said walls, a longitudinally extending upper arcuate edge on at least one of said walls, and a an elongate paddle, said paddle having a lower

surface for engaging said ~~at least one~~ edge for making sounds, said paddle lower surface having a pair of edges which extend longitudinally of said paddle and which are being arcuate longitudinally and having each of which has a contour longitudinally which conforms substantially to ~~the~~ a contour longitudinally of said ~~at least one~~ arcuate side wall edge.

Claim 7 (original). A box call according to claim 6 wherein said paddle lower surface has a centrally truncated lateral arc.

Claim 8 (original). A box call according to claim 6 wherein said paddle has a width of about 1 3/4 inch, and said paddle lower surface is arcuate laterally and has an arc rise laterally of about 1/8 to 3/16 inch.

Claim 9 (original). A box call according to claim 6 wherein said paddle has a width of about 1 3/4 inch, and said paddle lower surface is arcuate laterally and has an arc rise laterally of about 1/8 inch.

Claim 10 (original). A box call according to claim 6 wherein said paddle is pivotly attached to an end portion of said box.

Claim 11 (currently amended). A box call comprising a an elongate box having a pair of longitudinal longitudinally extending walls, a sounding chamber between said walls, a pair of longitudinally extending upper arcuate edges on said walls respectively, and a an elongate paddle, said box having an arc rise of about 3/16 to 1/4 inch, said paddle having a lower surface for engaging said edges for making sounds, said paddle lower surface having a pair of edges extending longitudinally of

said paddle and which have contours respectively contour longitudinally which conforms conform substantially to the contour longitudinally contours of said arcuate side wall edges respectively, said paddle has a width of about 1 3/4 inch, and said paddle lower surface is arcuate laterally and has an arc rise laterally of about 1/8 to 3/16 inch.

Claim 12 (original). A box call according to claim 11 wherein said paddle lower surface has a centrally truncated lateral arc.

Claim 13 (original). A box call according to claim 11 wherein said paddle arc rise laterally is about 1/8 inch.

Claim 14 (original). A box call according to claim 11 wherein said paddle is pivotly attached to an end portion of said box.

Claim 15 (canceled).

Claim 16 (canceled).
